

Note di Matematica

Volume 32, number 1, 2012

B.G. KONOPELCHENKO: <i>Birthday celebration speech for Professor Colin Rogers</i>	1
T. RUGGERI: <i>Birthday celebration speech for Professor Constantine Dafermos</i>	5
B. BOZZINI, D. LACITIGNOLA, C. MELE, I. SGURA: <i>Morphogenesis in metal electrodeposition</i>	7
A. CELLETTI: <i>Some stability results on nearly-integrable systems (with dissipation)</i>	47
S. BENJELLOUN, L. DESVILLETES, J.M. GHIDAGLIA, K. NIELSEN: <i>Modeling and Simulation of Thick Sprays through Coupling of a Finite Volume Euler Equation Solver and a Particle Method for a Disperse Phase</i>	63
ALAIN GORIELY, SÉBASTIEN NEUKIRCH, ANDREW HAUSRATH: <i>Helices through 3 or 4 points?</i>	87
HENRI GOUIN: <i>Statics and dynamics of fluids in nanotubes</i>	105
B. KONOPELCHENKO: <i>Unfolding of singularities and differential equations</i>	125
R. MONACO, S. PIERACCINI: <i>A mathematical model for environment evaluations in landscape ecology</i>	147
S. RIONERO: <i>Onset of convection in porous layers salted from above and below</i>	159
C. ROGERS, H. AN: <i>A Non-Isothermal Spinning Magneto-gasdynamical Cloud System – A Hamiltonian-Ermakov Integrable Reduction</i>	175
T. RUGGERI: <i>Local Constitutive Equations, Extended Thermodynamics and Maxwellian Iteration</i>	193
S. SIMIĆ: <i>Shock structure problem in multi-temperature gaseous mixtures</i>	207
T. ARIMA, A. IKOMA, S. TANIGUCHI, M. SUGIYAMA: <i>Fluctuating hydrodynamics based on extended thermodynamics</i>	227
